

Oceana Mirror Installation

1. Remove screws from all four sides of the metal frame.
2. Lift the frame straight up and place to the side.
3. Carefully remove individual 4x4 tiles from box.
4. Insert each 4x4 tile so one edge is covered by the inner frame (metal part around mirror).
5. Once all 26 tile are settled, gently place the outer frame overtop of the tile pieces.
6. Securely replace all of the screws into the side of the frame.
7. Frame may be hung horizontally or vertically (consumer preference) using the hanging cable provided.
